Lighthouse Guild is dedicated to providing exceptional services that inspire people who are visually impaired to attain their goals.

Our Health Center takes a multidisciplinary approach to healthcare offering eye exams by low vision specialists, occupational therapy, primary care, diabetes care, endocrinology, and podiatry.

Our Diabetes Services includes an American Diabetes Association-accredited self-management education program. Our endocrinology specialists help manage diabetes and provide individual and group sessions that teach practical techniques to maintain health.

As part of our Low Vision Services our optometrists evaluate the level of vision loss and recommend tools and exercises to help people read, work, socialize, and enjoy other activities.

Our Rehabilitation and Technology Services enable individuals to attain their goals, whether that be to work, to go to school, to shop or to navigate their community. A multidisciplinary team offers occupational therapy, training in assistive technology, orientation and mobility, activities of daily living, college preparation and career services.

Lighthouse Guild Programs & Services

Attain Your Goals

We’re Here to Help
If vision loss is interfering with your quality of life, Lighthouse Guild’s services can help.

We are a Medicare and Medicaid provider, and accept most insurance plans.

To make an appointment: 212-769-6313 or go to lighthouseguild.org
Our **Technology Center** offers a one-stop resource for vision care, rehabilitation, and technology training. It features a Smart Home, where people can try the latest innovations such as the ability to use voice commands to change their thermostat, control their lighting, answer the phone, and lock their front door. Occupying 11,000 square feet, the Center is located at Lighthouse Guild’s New York City headquarters. It is the premier facility in the U.S., serving as a hub connecting vision technology innovators and users.

Dorothy Strelsin Behavioral Health Clinic operates the only behavioral health center in the U.S. for people who are visually impaired or at risk for vision loss. Services include individual therapy, couples and family counseling, and group therapy.

Our national **Tele-Support Network** enables parents of children with vision impairment as well as teens and adults with vision loss to connect with their peers to share resources, experiences and support.

We provide **support for students** with vision impairment to prepare for life after high school in a career or college by offering counseling, and advanced computer and technology training. Programs teach confidence-building, leadership, practical skills like cooking, physical fitness, and creative expression.

We have a merit-based national **scholarship program** that helps legally blind high school students from across the country attend college. Our graduate school scholarship supports students pursuing a degree after college.

Through **Advocacy** efforts, we advocate for appropriate legislative responses to issues affecting people with vision loss.

Through our **Research Institute**, we conduct studies designed to translate scientific findings and technological advances into useful solutions for people living with vision loss. We also recognize excellence in vision care and research through our **Vision Science Awards**.
